11 Rue d'Egmont  
1000 Brussels, BELGIUM

Date: 13 February 2017

Reference: One year follow-up OECI A&D programme

Dear Board of Directors of Regina Elena National Cancer Institute,

As certified OECI Comprehensive Cancer Centre your centre provided a follow-up progress report regarding the actions and goals formulated in your improvement action plan.

One of the ultimate goals of the OECI A&D Programme is to achieve a visible and reliable quality management system and a continuous quality improvement culture in the oncology institutes in Europe. This should support quality and comprehensiveness in oncology care, research and education.

Advised by the audit team chair, the A&D Board beliefs that your centre has adjusted the recommendations of the peer review report, and is taking the actions as planned in the improvement plan. Therefore, the A&D Board is full of confidence in the ability and willingness of your centre to continuous improve and maintain the quality of oncology care.

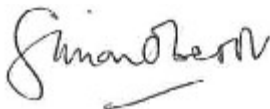

According to the information you have provided, Regina Elena National Cancer Institute, has implemented a significant part of the improvement plan.

The follow-up report will be added to the electronic tool as input for a second accreditation round.

We would also like to remind you on the possibility to do an intermediate self-assessment in the e-tool. We are promoting this option as an opportunity to measure the progress in your centre according to the OECI Quality Standards. Access to the e-tool is free for the time of the validity of your certificate.

We look forward to the fruitful continuation of cooperation in the OECI Accreditation and Designation Programme.

On behalf of the OECI Accreditation and Designation Group,

Simon Oberst  
Chair OECI Accreditation and Designation Programme
