A FUTURE IN THE COUNTRY ?

More and more people want to live the rural life... but...

- 1 City life is cool; but is country life cooler? ~~misled me to believe there was more to it~~
- 2 Apparently yes.
- 3 After the terrible Covid-19 epidemic of 2020, lots of people would like to leave their city and live in the country.
- 4 More and more people in Britain want to live in the country, and this is causing more and more problems in some **rural areas**.
- 5 The population of British cities has been falling for years. Cities like Liverpool and Glasgow have lost about 30% of their population in 30 years. But Britain's population is still growing. Where are the people going?
- 6 Answer: to the country.
- 7 The English **countryside** has a classic image. People imagine that life in the country is slow and calm; that there are no **traffic jams**, no pollution, and no crime. In some places, this is true; but in others it is not.
- 8 Small towns and villages are becoming more and more popular; people have more space and most houses have gardens. But problems are growing. Lots of people want to live in the country and work in the city; so more and more people **travel** long distances each day, to go to work.
- 9 Of course they ~~don't~~ use buses (they are too slow) or trains (they don't stop in the country); they use cars. And although they live in the country, they want to use supermarkets and good fast roads.... but they do not want to see them or hear them. Besides, lots of young people say that life in the country is boring: there is not enough to do, there are not enough activities and excitements.
- 10 Little villages now have traffic problems in the morning, just like big cities! And they are getting **worse**.
- 11 The problems are very complicated! If everyone moves into the country, large parts of the countryside will disappear! People leave cities and big towns, to escape from urban problems; but more and more, they are bringing their problems with them.
- 12 On warm summer days, and cold winter days, air pollution can be a big problem in large parts of the south of England, not just in London. Traffic jams are now often part of life, even in the country; crime has become a serious problem in rural areas.
- 13 Perhaps there is hope for the future. Soon Britain's population will stop **rising**. From about the year 2030, it will perhaps start to fall.
- 14 In 100 year's time, there will be less people in Britain than today – perhaps two million less. No doubt there will be less pollution too; oil and petrol will probably be rare by then.
