#### **Training objectives**

The Interfaculty Higher Education Course in Statistical Methods for Biomedical Research and Practice is aimed primarily at development of professionalism and quantitative skills within healthcare facilities, in particular deepening the statistical and epidemiological operational methodologies that NHS managers must know how to use it for the critical evaluation of scientific literature and for a correct and more rigorous exercise of one's profession. The course is inter-faculty as it includes two basic disciplines: statistics and epidemiology; statistical skills, including use of R software, are provided by the Faculty of Information Engineering, Computer Science and Statistics while epidemiological skills are provided by the Faculty of Pharmacy and Medicine. The Course, due to its "post-graduate" configuration and the attention paid to the development of technical skills, proves to be particularly suitable both for managers already working in the NHS and for young graduates awaiting employment in the NHS or in structures related.

#### **Obiettivi formativi**

Il Corso di Alta Formazione Interfacoltà in Metodi Statistici per la Ricerca e la Pratica Biomedica è finalizzato primariamente allo sviluppo di professionalità e competenze quantitative all'interno delle strutture sanitarie, approfondendo in particolare le metodologie operative di tipo statistico ed epidemiologico che i dirigenti del SSN devono saper utilizzare per la valutazione critica della letteratura scientifica e per un corretto e più rigoroso esercizio della propria professione. Il Corso è interfacoltà in quanto prevede due discipline di base, la statistica e l'epidemiologia; le competenze statistiche, incluso l'utilizzo del software R, sono fornite dalla Facoltà di Ingegneria dell'Informazione, Informatica e Statistica mentre le competenze epidemiologiche sono fornite dalla Facoltà di Farmacia e Medicina. Il Corso, per la sua configurazione "post-laurea" e per l'attenzione prestata allo sviluppo di abilità di tipo tecnico, si rivela particolarmente adatto sia a dirigenti già operanti nel SSN sia a giovani laureati in attesa di inquadramento nel SSN o in strutture correlate.
